

Pouracide for Cattle

Pouracide NF is a pour-on insecticide treatment for cattle.

Pouracide NF is a single dose back-line spray for the control of lice on cattle for up to 6 weeks.

Pouracide NF also provides control over the irritating effects of biting flies for up to three weeks

Alphamethrin 7g/L, Tetrachlorvinphos 20g/L, Piperonyl Butoxide 75g/L

EFFICACY SPECTRUM:

Sucking Lice - *Linognathus vituli*

Biting Fly – *Stomoxys calcitrans*

DOSE RATE 10mL per 100kg bodyweight

Bodyweight	Dose Volume	5L Treats
100kg	10ml	500
200kg	20ml	250
300Kg	30ml	166
400kg	40ml	125

Maximum 40ml Dose Required

Caution: in rare cases some cows are irritated by synthetic pyrethroids for 48 -72 hours after application. This tends to be on a herd basis and repeatable, so do not use on cows known to have been irritated by synthetic pyrethroids previously. Do not use on calves under three months due to skin sensitivity.

WITHHOLDING PERIODS

Milk - Nil.

MEAT – Cattle producing meat or offal for human consumption must not be sold for slaughter wither during treatment or within 7 days of the last treatment
